TAXONOMIC CONFERENCES – SOME FACTS AND REMARKS

Section on Classification and Data Analysis of Polish Statistical Society (SKAD) has been the member society of International Federation of Classification Societies (IFCS) since 1993. This society was established in 1989 as Taxonomic Section at the conference in Mogilany (near Cracow) and changed its name to SKAD in 1993. The section was founded thanks to the initiative and efforts of three professors: Zdzisław Hellwig, Kazimierz Zajac and Józef Pociecha.

It is worth to mention that before 1989 Wrocław University of Economics organized five conferences in classification and data analysis. They took place in the following cities and towns: 1979 – Szklarska Poręba, 1981 – Wrocław, 1983 – Ustronie near Kępno, 1984 – Zachełmie near Jelenia Góra, 1987 – Zachełmie near Jelenia Góra.

The regular annual conferences have been taking place since 1993, in the following cities and towns: Karpacz, Cracow, Szklarska Poręba, Ustroń, Łódź, Świeradów Zdrój, Ryto, Ustroń, Łądek Zdrój, Międzyzdroje, Skorzęcin, Białowieża, Podlesice k. Kroczyca, Wisła.

The information about SKAD is given at the Website: www.skad.pl.

Table 1 presents synthetic information about papers contained in all volumes of Taxonomy (from all taxonomic conferences).

The following remarks could be added to the facts presented:

- since 1993 the papers presented at the conferences are published by Wrocław University of Economics;
- the reports about the conference are published in “Statistical Review” (“Przeгляд Statystyczny”) and in the IFCS Newsletter, in addition the information is available on SKAD Website;

Table 1. The classification of papers contained in all volumes o Taxonomy (from all taxonomic conferences)

Source: www.skad.pl.

- there is a growing number of the participants of the conferences, particularly this refers to young researchers;
- there is a growing number of universities, being the affiliations of the authors of the papers;
- there is a growing number of papers presented;
- since 2004 very strict procedure of the selection of papers has been introduced;
- the balance between theoretical and applied papers in long term is observed.

FAKTY I REFLEKSJE O KONFERENCJACH TAKSONOMICZNYCH

Streszczenie

W artykule w syntetycznej formie przedstawiono rys historyczny konferencji taksonomicznych oraz statystykę wygłoszonych i opublikowanych referatów w podziale na poszczególne lata i ośrodki akademickie. W zakończeniu przedstawiono fakty i refleksje płynące z 20 dotychczasowych konferencji taksonomicznych.
